Multi-well Vessel-based P&A

Owning the most diverse decom track record in the North Sea, EXCEED's vessel-based P&A capability was established to provide a trusted, compliant carbon neutral subsea wellhead removal service that provides significant cost efficiencies through a campaign approach.

Project Overview

In 2021, EXCEED was awarded its first vessel-based multi-well P&A campaign, to be undertaken on behalf of four operators.

Contracted on a lump sum basis, the abandonment campaign totalled nine wells, plus four survey wells (ROV and wellhead intervention activity) to determine a future abandonment programme. Working in conjunction with our partners, Mermaid Subsea UK, the turnkey service comprised:

- Project Management & Engineering
- Equipment
- Vessel Operations
- Mobilisation
- Transit
- Demobilisation

With a core team of eight personnel (five onshore, three offshore), EXCEED's workscope comprised:

- Categorisation & independent well review
- QHSE including regulatory submittals
- Project and contract management
- Subcontractor management
- Logistics
- Operational procedures
- Waste disposal
- Operational supervision onshore and onsite
- Final reporting

90 Days

HSE

Zero LTIs

ENVIRONMENT

Zero spills

Leading Energy Transformation

With multiple efficiencies recorded for future campaigns, EXCEED's approach has been recognised across the North Sea as minimising the environmental impact of multiple, separate campaigns and encouraging collaboration at operator and supply chain level. EXCEED's vessel-based P&A team was subsequently awarded a multi-operator well campaign to commence in 2023.
