

Client Testimonials

Don't take our word for it, please speak to our past clients;

Exceed is fully committed to provide the highest level of personnel, project performance and value to its clients. The key gauge of successful project delivery is not only measured by hard performance indicators but also in the satisfaction of the end user. Excerpts from previous client's feedback are highlighted below;

"The Bambo drilling campaign in offshore The Gambia in West Africa was successfully delivered in Nov/Dec 2021 under some very challenging circumstances, which included the world-wide covid pandemic, remote location and supply chain issues, unexpected fluid losses, and a new side-track well added to the program at very short notice. This was all effectively achieved with the outstanding performance of the Exceed Wells Management Company who undertook the project /operations management and well engineering services. Of particular note is that Exceed provided a dedicated group of highly competent personnel with excellent team behaviours who integrated seamlessly with the FAR asset and subsurface teams. All issues in the Bambo campaign were dealt with carefully and comprehensively. I can only re-iterate, FAR is very satisfied with the exceptional and professional performance of Exceed's well management team."

Rolf Stork | Asset Manager, Gambia

FAR – Deepwater Exploration Well offshore The Gambia on a full well management basis (engineering, planning, contracting, logistics including supply base set-up in Dakar, execution and close-out) all carried out compliantly with regulatory, tax and transboundary permitting for waste exportation requirements.

Serica Energy

Exceed act as Serica's wells department and an extension of their company. As highlighted above, Exceed has delivered three well construction projects (two with **moored semi-submersible rigs**) for Serica in the last 4 years and are planning subsea infill development wells on the Bruce field. Furthermore, Exceed recently managed well decommissioning work on the Keith field using the Ocean Patriot (moored semi). This well management work includes engineering, planning, contracting, logistics, execution, and close-out; all carried out compliantly in the UKCS with Serica bridging to Exceed's management system and well delivery process to allow them to be well operator for their own work.
